OBJECTIVE

Seeking a Software Engineer role to leverage my expertise in full-stack development (ReactJS, Java Spring Boot, MySQL). Committed to building scalable, user-friendly applications while continuously learning new technologies and collaborating effectively with teammates.

EDUCATION

Bachelor of Software Engineering, The University of Texas at Dallas   **December 2022**

Courses: Software Architecture and Design, Database Systems, Software Verification and Testing, Software Engineering, Advance Java, Data Structures and Introduction to Algorithmic Analysis, and Requirements Engineering.

PROJECTS EXPERIENCE

VerifyMeID – Sponsored by Fellows Consulting Group, LLC   **Jan 2022 – May 2022**
- Used Flutter, Node.js, Express.js, MySQL Workbench in an agile environment.
- Developed RESTful API using Express.js with Node.js as our server environment. The team created a pseudo-organization with MySQL to authenticate existing service employees in the organization.
- Met biweekly with engineers to discuss features and progress.

GitHub

Chat App (Flutter)   **Jan 2023 – Feb 2023**
- Fullstack application with Flutter and Firebase.
- Implemented Firebase Authentication for secure and streamlined user authentication.
- Utilized Firebase Cloud Firestore for a scalable, real-time synchronized NoSQL database in a chat app, ensuring seamless user interactions and secure storage of user profiles and group chat data.

GitHub

Task Manager CRUD Full Stack Web   **April 2024**
- Fullstack web application utilizing Java Spring Boot, MySQL, and ReactJS.
- Using Spring Boot (Spring Web, MySQL Driver) to implement RESTful endpoints to enable CRUD operations and MySQL database to store task details.
- Utilized ReactJS to create a responsive and intuitive user interface organizing tasks.
